PRODUCT HIGHLIGHTS

Model 1740 Women's Sliding Short:

Lightweight: Breathable 1/8" mesh padding provides protection with very little weight.

Durable: Mesh padding is one piece woven polyester - will not tear, separate or break down.

Comfortable: True 4-way stretch, high quality, nylon/Lycra greatly reduces "riding up" and chafing.
(Many other sliding shorts stretch widthwise but not lengthwise).
"Aqualflow" treated for fast evaporation of moisture.

Designed for the Female Athlete:

Padding reduced to back of leg to eliminate the feeling of a bulky padded short.
Seamless front panel.
Waistband cut low in front to eliminate the need to roll it down.

Color: White or Black
